BRANDING EXPERTISE APPLIED AT
www.barron.com

ON BRANDING

Each product has a suggested branding method icon, these are suggestions of the best branding method to use for your products

SCREEN PRINTING

Screen printing is a printing technique whereby a mesh screen is used to transfer ink onto a substrate. This is the most common method of imprinting on promotional items and apparel.

EMBROIDERY

Embroidery is stitched with a computerised embroidery machine using patterns digitised with embroidery software. Artwork must first be digitised, which is the specialised process of converting two-dimensional artwork into stitches.

HEAT PRESS

Heat press is imprinting a design or graphic onto a substrate, with the application of heat and pressure for a pre-set period of time.

DYE SUBLIMATION

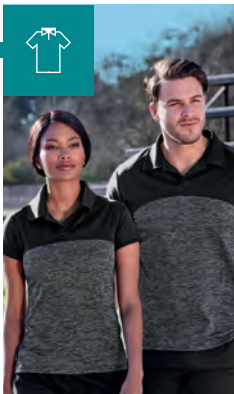

Digitally printed directly onto a vinyl adhesive substrate that can be cut into a variety of shapes and sizes. The stickers are then coated with a polyurethane to give a dome-like appearance creating a 3D effect.

A woman with dark hair and a confident expression is leaning against a weathered, teal-green wall. She is wearing a blue sleeveless tank top, dark grey leggings, and black sneakers. Her right hand is on her hip, and her left hand rests on her thigh. The wall has a horizontal white stripe and visible cracks. The overall mood is active and stylish.
